PROFESSIONAL SUMMARY

Backend Software Engineer with 8+ years of experience specializing in .NET Core, Node.js, and modern web technologies. Proven track record of architecting microservices, building scalable applications serving 100,000+ users, leading development teams of 5+, and delivering high-performance, AI-integrated solutions.

EXPERIENCE

Backend Developer (Full-time)

VCVEnglish Educational Group (https://vcvenglish.com)

📅 Feb 2023 - Oct 2025   📍 Hybrid

- Led team of 5+ developers building microservices-based educational platform with ASP.NET Core and Next.js/React, serving 100,000+ users. Implemented CI/CD pipelines with GitHub Actions, reducing deployment time by 70%.
- Architected RESTful APIs with JWT/JWE authentication and Entity Framework Core multi-tenant design. Released cross-platform mobile applications on Google Play and Microsoft Store.
- Integrated AI-powered chat assistant for 10,000+ concurrent users, with responses based on educational course materials and wallet-based cost tracking, significantly increasing student engagement.

Backend Developer (Full-time)

Gardesh International Ltd. (Nirutavan Holding Subsidiary)

📅 May 2021 - Dec 2022   📍 Tehran, Iran

- Directed backend development for aerospace ticketing system handling 1,000+ daily transactions.
- Engineered robust system with integration across 5+ airlines, reducing processing time by 60%.
- Built scalable infrastructure with Node.js, Express, Nginx, and PostgreSQL achieving 99.9% uptime.

Full-Stack Developer (Part-time)

VCVEnglish Educational Group (https://vcv.ir)

📅 Aug 2016 - Nov 2022   📍 Remote

- Designed and maintained 3 major versions using .NET (WebApp, MVC) and SQL Server for 50,000+ users.
- Developed responsive applications with jQuery and Bootstrap achieving 95% user satisfaction.

FEATURED PROJECTS

Online Classified Ad/Listing Website (https://kichichi.co)
Platform for Iranian migrants using Vue.js/Nuxt.js and Django/PostgreSQL, serving 5,000+ monthly active users.

Scalable Content Distribution System (https://github.com/API-Mate)
Open-source serverless app for sending or scheduling posts across multiple social networks using Nuxt.js, Node.js, MongoDB.
