SO FAR PROJECT EXPERIENCE

Online classified advertising website (https://kichichi.co)
It's a classified advertising website that is build with VueJS/NuxtJS at FrontEnd and Django/PostgresSQL in Backend.

Scalable content distribution system in social network websites (https://github.com/API-Mate)
It's an open-source project where we can send content to websites like facebook, twitter, linkedin, discord, etc. It's a web app that is build with serverless methodology.

Bussiness portfolio website (https://nirutavan.com)
It's actually well known company in Iran that done many great project. I developed their portfolio website using VueJS/NuxtJS and bootstrap all by myself. It's a responsive website that is fully compatible with all devices, and also SEO friendly and fast loading.

- Updated on January 2023 - version 2.1
